

RIGEL WORKSTATION™

FOCUS INVESTIGATION EFFORTS

SAVE VALUABLE TIME & RESOURCES

APPREHEND SERIAL OFFENDERS FASTER

THE NEXT GENERATION OF RIGEL

ENHANCED GEOGRAPHIC PROFILING, IMPROVED WORKFLOW & MORE!

NEW ANALYSIS WORKFLOW MANAGER

Steps you through the process of analyzing a case and remembers where you are in the case.

NEW CRIME AND SUSPECT DATABASES

Create and manage your own crime and suspect databases shared by all your cases. Conduct searches, generate filtered subsets, view and select graphically on the map.

CASE UPDATES

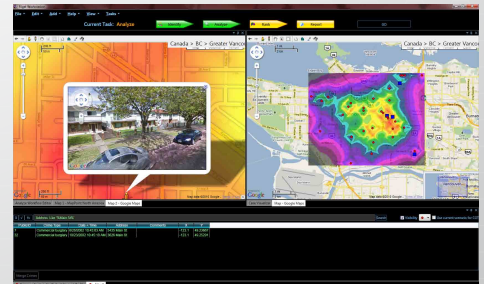

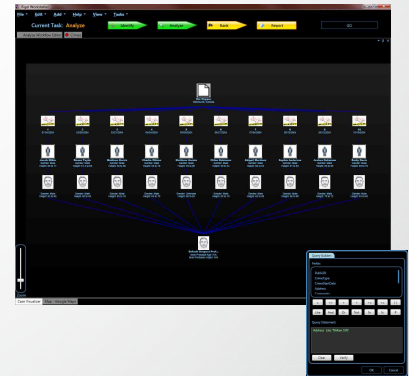

Automatically import new crimes and suspects and test them for a match against ongoing cases

MULTI-VIEW GEO VIEWER

Open multiple linked map views of your data at once, using multiple map services at the same time (e.g., ArcGIS and Google Maps).

CGT GEOGRAPHIC PROFILING

Just like Rigel Analyst, with new enhanced features.

EXPAND YOUR ANALYSIS CAPABILITY WITH ADDITIONAL MODULES

BAYESIAN LINKAGE ANALYSIS MODULE

Link crimes based on likelihood ratios taking all available factors into account. Automatically evaluate linkage to outstanding cases when new crimes are added to your database.

ESP – EVIDENCE-BASED SUSPECT PRIORITIZATION MODULE

Prioritize suspects based on integrated results from all your analysis tools. Includes witness description analysis, discrete category analysis, Gaussian probability distributions. Incorporate any custom analysis generating a likelihood ratio. Includes new Rigel Pipes™ graphical analysis dataflow
